

17 January 2011

Dear All

**Lecture by Dr Guy Sutton '*21<sup>st</sup> Century Conceptions of Mental Illness*' - Monday 14 February 2011**

I am writing to promote a fantastic evening lecture by neuroscientist, Dr Guy Sutton, delivered as part of our celebratory Year of Science. The lecture is entitled '*21<sup>st</sup> Century Conceptions of Mental Illness*' and will look at modern thought regarding disorders such as schizophrenia, depression and eating disorders and address epigenetic theories of neuropsychiatric disorders. Guy is an energetic, inspirational and fascinating speaker and his talk will appeal to psychology, biology and chemistry students and anyone with an interest in the brain.

The lecture will take place on Monday 14 February at 7.30pm in the David Russell Theatre. Following on from our seminars in neuroscience in the day time, the lecture is a compulsory event for both IB and A Level psychology pupils but also open to all parents, friends and interested others.

We very much look forward to seeing you. Although tickets are not issued and there is no reserved seating; it would be very helpful if you could let us know if you can come so that we can plan numbers accordingly. Please email [development@pgs.org.uk](mailto:development@pgs.org.uk) or call 023 9236 4248 to confirm your attendance.

With kind regards

**Amanda Wood**  
**Head of Psychology**
